JOHN S. BEULICK C/O ARMSTRONG TEASDALE, LLP ONE METROPOLITAN SQUARE SUITE 2600 ST LOUIS, MO 63102-2740			ART UNIT 2616	PAPER NUMBER
DATE MAILED: 06/05/2006				

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	09/682,883	DANNER ET AL.	
	Examiner	Art Unit	
	Prenell P. Jones	2616	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 20 January 2006.
 2a) This action is FINAL. 2b) This action is non-final.
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) Claim(s) 1-20 is/are pending in the application.
 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
 5) Claim(s) 11 is/are allowed.
 6) Claim(s) 1-4,7,12,14 and 17 is/are rejected.
 7) Claim(s) 5,6,8-10,13,15,16 and 18-20 is/are objected to.
 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.
 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) <input checked="" type="checkbox"/> Notice of References Cited (PTO-892)	4) <input type="checkbox"/> Interview Summary (PTO-413)
2) <input type="checkbox"/> Notice of Draftsperson's Patent Drawing Review (PTO-948)	Paper No(s)/Mail Date: _____
3) <input type="checkbox"/> Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date: _____	5) <input type="checkbox"/> Notice of Informal Patent Application (PTO-152)
	6) <input type="checkbox"/> Other: _____

Response to Arguments

1. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

In light of Applicants argument, previous 112 rejections are withdrawn.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
3. Claims 1-4,12 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shenzhen Fiberscape Technology Co., Ltd (Non-patent literature) in view of DOLEMO Corp. (Non-patent literature).

Regarding claims 1, 4 and 12, Shenzhen Fiberscape Technology Co., Ltd discloses an Ethernet switch that includes multiple ports for communicating to a multiple devices, and operates at a temperature of 0 degrees Celsius to 60 degrees Celsius, and a operating humidity of 10% to 95%, and supports VLAN and virtual stacking (page 2 of 3). Shenzhen Fiberscape Technology Co., Ltd is silent on utilizing an Ethernet switch in a non-office environment. In analogous art, DOLEMO discloses an Industrial (non-office) Ethernet switch that operates at a temperature of 0 degrees Celsius to 60 degrees Celsius, and a operating humidity of 10% to 95% (page 3 and page 9), a plurality of ports, plurality devices and associated ports and repeater functionality (page 3, page 6). In addition, it is inherent for a switch to transfer data among multiple devices at wired speed. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to be motivated to implement an Ethernet switch in a non-office environment as taught by DOLEMO with the teachings of Shenzhen Fiberscape Technology Co., Ltd for the purpose of increasing the durability of the system.

Regarding claim 2, Shenzhen Fiberscape Technology Co., Ltd discloses an Ethernet further discloses that the Ethernet switch is virtually stackable (page 2).

Regarding claim 3 and 14, Shenzhen Fiberscape Technology Co., Ltd discloses an Ethernet further discloses that the Ethernet switch operate in conjunction with a plurality of available modules that accommodate speeds of at least a gigabit (page 2).

Art Unit: 2616

4. Claims 7 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shenzhen Fiberscape Technology Co., Ltd (Non-patent literature) in view of DOLEMO Corp. (Non-patent literature) as applied to claims 1 and 12 above, and further in view of Compaq (Non-Patent literature).

Regarding claims 7 and 17, as mentioned above, Shenzhen Fiberscape Technology Co., Ltd discloses an Ethernet switch that includes multiple ports for communicating to a multiple devices, and operates at a temperature of 0 degrees Celsius to 60 degrees Celsius, and a operating humidity of 10% to 95%, and supports VLAN and virtual stacking (page 2 of 3). Shenzhen Fiberscape Technology Co., Ltd is silent on utilizing an Ethernet switch in a non-office environment. In analogous art, DOLEMO discloses an Industrial (non-office) Ethernet switch that operates at a temperature of 0 degrees Celsius to 60 degrees Celsius, and a operating humidity of 10% to 95% (page 3 and page 9), a plurality of ports, plurality devices and associated ports and repeater functionality (page 3, page 6). In addition, it is inherent for a switch to transfer data among multiple devices at wired speed. However, both Shenzhen Fiberscape Technology Co., Ltd and DOLEMO are silent on supporting a VLAN, QoS, RMON, SNMP and a Spanning Tree. In a COMPAQ GIGABIT Ethernet switch, COMPAQ discloses accommodating support VLAN, QoS, RMON, Spanning tree and SNMP communication (pages 2-4). Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to be motivated to implement an Ethernet switch that accommodates VLAN, QoS, RMON, Spanning tree and SNMP as taught by COMPAQ with the combined teachings of Shenzhen Fiberscape Technology Co., Ltd and DOLEMO for the

purpose of further providing communication for high performance applications in an Ethernet environment.

Allowable Subject Matter

5. Claim 11 is allowed over prior art.
7. Claims 5, 6, 8-10, 13, 15, 16 and 18-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

Although the cited prior art discloses a networking system that implements inter-networking and whose architecture includes a switching network wherein the Ethernet switch has a plurality of ports and coupled to a plurality of hubs or concentrators which are coupled to end-stations, Ethernet switch accommodates high-end VLAN applications and switch includes a plurality of plug-in modules, utilization of flexible industrial and educational computer system that includes desktop environment, WLANs are utilized, WLANs devices such as, Ethernet utilize portions of the radio spectrum, utilization of IRWLAN, accommodating Ethernet ports or radio ports and virtual private networks are proprietary, use of virtual networks for providing adequate security for users, Ethernet devices, WLAN/Ethernet technical details reveal temperature range of 0 to 60 °C, and Ethernet switch that supports high-end features, such as VLAN protocol, RMON, QoS, SNMP and Spanning tree and a storage environment whereby the humidity is 10% to 95% non-condensing and switch operating at one gigabit they fail to teach or suggest with respect to claims 5, 6, 8, 11, 15, 16 and 18, extended vibration of at least 2g and shock vibration of at least 4 g, with regard to claim 13, a second switch operationally coupled to a first switch, wherein first switch and second switch are configured to cooperatively operate as one switch.

Conclusion

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Prenell P. Jones whose telephone number is 571-272-3180. The examiner can normally be reached on 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chi Pham can be reached on (571) 272-3179. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
